SUMMARY

Backend-focused Software Development Engineer with 3+ years of experience designing and shipping production-grade enterprise and consumer applications using **Java, Spring Boot, REST APIs, SQL Server, MySQL, MongoDB, and React Native**. Proven in performance optimization, scalable API design, data modeling, application security, and production support for enterprise and IoT-enabled products.

TECHNICAL SKILLS

Languages: Java (8/11/17), SQL, JavaScript, TypeScript
Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST API Design, Microservices Architecture, Layered Architecture, Transaction Management, Request Validation
Core Java: OOP, Collections Framework, Generics, Streams and Lambdas, Multithreading, Exception Handling, Design Patterns, SOLID Principles
Databases & Search: Microsoft SQL Server, MySQL, OpenSearch, Relational Data Modeling, Query Optimization, Indexing, Stored Procedures
Security: JWT Authentication, Role-Based Access Control (RBAC), API Authorization, Input Validation
Caching & Messaging: Redis, Apache Kafka
Testing & API Docs: JUnit 5, Mockito, Postman, Swagger / OpenAPI
DevOps & Tools: Docker, CI/CD, Git, GitHub, Maven, Linux
AI & Developer Productivity: Claude AI (Anthropic) for tool building, Claude API integration, Prompt Engineering, LLM-assisted code generation, refactoring, debugging, and test writing
Frontend & Mobile: React.js, React Native, Bluetooth Low Energy (BLE) integration

PROFESSIONAL EXPERIENCE

INNEFU LABS **Nov 2025 – Present**
Assistant Programmer, Software Development (Client Site) *Delhi, India*

- Own backend development for a client-deployed enterprise operations platform, translating business requirements into **Java 17 / Spring Boot** services across the full **SDLC**: design, development, testing, deployment, and support.
- Reduced critical-path API latency by **98% (52s to ~1s)** through request profiling, elimination of N+1 and redundant database calls, and **SQL Server** query tuning and indexing.
- Designed secure, versioned **RESTful APIs** with request validation, centralized exception handling, and **Swagger/OpenAPI** documentation for frontend and integration teams.
- Enforced **Role-Based Access Control (RBAC)** and method-level authorization, conducting security checks to protect sensitive organizational data.
- Act as primary point of contact for **production support** at the client site: incident triage, log analysis, root-cause analysis, and hotfix delivery.

ROOT INFO SOLUTIONS **Aug 2024 – Aug 2025**
Software Engineer *Delhi, India*

- Delivered full-stack features for consumer IoT and e-commerce products, owning **Spring Boot** microservice endpoints and their **React Native / React.js** client integrations.
- Implemented polyglot persistence with **MySQL** for transactional data and **MongoDB** for device and event data.
- Built **JWT** authentication, request middleware, and client–server data synchronization, improving app stability through systematic defect resolution.
- Collaborated with hardware, QA, and design teams in an **Agile** workflow to ship releases to Google Play and the App Store.

TATA CONSULTANCY SERVICES (TCS) **Oct 2020 – Oct 2021**
Programmer *Noida, India*

- Enhanced client web applications using **JavaScript, HTML, and CSS**, delivering UI improvements and functional fixes.
- Wrote **SQL** queries for data extraction, validation, and reporting; analyzed application logs and production data to support defect investigation.

PROJECTS

Enterprise Administration & Operations Management Platform *Innefu Labs*
Java, Spring Boot, Spring Data JPA, Hibernate, Microsoft SQL Server, REST APIs, RBAC

- Built a unified platform integrating **Inventory, Visitor, Library, and Task & File Movement** modules, replacing manual and Excel-based tracking across multiple departments and branches.
- Engineered asset lifecycle management for **20,000+ IT assets**: onboarding, allocation, warranty, AMC, software licensing, and end-of-life, with **QR code** based identification.
- Modeled normalized relational schemas with **transaction management** and multi-branch data isolation for interconnected modules.
- Implemented workflow automation for task and file movement: assignment, prioritization, deadlines, status transitions, and audit trails, plus reporting dashboards.

Scentiment – IoT-Enabled Perfume Dispenser & E-Commerce App Play Store | App Store
Java, Spring Boot, React Native, MySQL, MongoDB, JWT, Bluetooth Low Energy (BLE)

- Developed backend services for user management, product catalog, orders, and remote device control using a layered, modular architecture.
- Integrated **BLE** in React Native for real-time communication with IoT perfume dispensers, with reliable state sync between hardware, mobile clients, and backend.

EDUCATION

Master of Computer Applications (MCA) – GPA: 8.23/10 **Sept 2022 – June 2024**
Central University of Haryana *Haryana, India*
Coursework: Data Structures, Algorithms, Operating Systems, Artificial Intelligence, Computer Networks, DBMS

Bachelor of Computer Applications (BCA) – GPA: 8.0/10 **Aug 2017 – Oct 2020**
Kumaon University *Nainital, India*
Coursework: C Programming, Data Structures and Algorithms, Operating Systems, Web Development, DBMS

CERTIFICATIONS

- Full Stack Web Development: JavaScript and Node.js – Coursera (Meta)
- Spring Boot Fundamentals – Udemy
